

## BLANK NOTES:

After having some problems with the different versions of Astah some annotations stopped showing. They have been numbered and their content can be found below:

- **N1:** Only the referee who wrote the report, the customer who worked on the task with the complaint and the customer who complaint can write notes or comment on notes. The writer of the note must leave a comment when the note is created.
- **N2:** It must store the moment the entity was created.
- **N3:** Actors cn only endorse other actors with different role. An actor can only send one endorsement per actor
- **N4:** Only one application among all the applications for a fixup task can be accepted.
- **N5:** A referee can only self-assign complaints that haven't been self-assigned before. Only one complaint per referee can be assigned.
- **N6:** If end and the start are not null, the start moment must be before the end moment.
- **N7:** Every category belongs to a parent category, but the root category, which is called "CATEGORY". The root category cannot be deleted or modified. The root category is its own parent.
- **N8:** The finder stores the fix-up tasks that pass the filters for one hour by default.
